- **HANDSETS**
Kirk 5020 & 5040 Handsets

Product Overview

KIRK Wireless Server 300 **SIP solution for SMBs**

The KIRK Wireless Server 300 is a single cell solution for small businesses with a need to supply up to 12 mobile employees with a wireless handset. The infrastructure of the KIRK Wireless Server 300 consists only of the server itself and the KIRK Handsets, making it very simple to get the business wireless. Small businesses with large geographical areas and multiple floors can extend radio coverage by adding one or more KIRK repeaters to the KIRK Wireless Server 300 — and also small businesses with multiple locations can easily offer mobility benefits to their employees by installing KWS300 at each location. The KIRK Wireless Server 300 not only eliminates the need for non-standard cabling, it also simplifies administration and maintenance, reduces costs and improves employee mobility and remote connectivity.

KIRK Wireless Server 6000 **SIP server for large enterprises**

The KIRK Wireless Server 6000 is a complete wireless enterprise solution. Seamless handover between base stations, extensive radio coverage, messaging to handset, value added applications and scalability are just some of the benefits of the KIRK Wireless Server 6000. The KIRK Wireless Server 6000 consists of the KIRK Wireless Server 6000 itself, KIRK Media Resources, KIRK Base Stations, KIRK Repeaters and KIRK Handsets. A flexible license option allows you to only pay for extra users when you need it. You pay, you upgrade and you have more mobile users. Up to 256 KIRK Base Stations and up to 4096 wireless users can be subscribed to the KIRK Wireless Server 6000, making it extremely scalable and the ideal choice for fast growing and large businesses.

KIRK 5020 Handset **Elegant handset for mobile workers in administrative environments**

The KIRK 5020 is an elegant yet robust handset with a large color display and intuitive menu structure. These features make it a valuable tool and preferred choice for mobile workers in administrative working environments across the range of vertical markets.

Frequency bands:
1881.792-1897.344 MHz
1921.536-1928.448 MHz
1911.168-1926.720 MHz

KIRK 5040 Handset **Elegant Bluetooth handset for mobile workers in administrative environments**

The KIRK 5040 handset is a lightweight DECT phone that combines an intuitive user interface and wireless headset that can be operated hands-free and wirelessly with a Bluetooth headset. Like the KIRK 5020, the 5040 can quickly be switched to silent mode and will distinguish between external and internal calls by ring tone. The KIRK 5040 handset also features an intuitive user interface and a large color-display offering an experience similar to a mobile phone and with the added benefit of hands-free operation.

Key Features/Benefits

- Quality in terms of voice quality - no noise, no jitter, no delays to disturb conversations
- Quality in terms of the physical handset: One of the lowest return rates in the industry speaks for itself
- Robust security based on DECT standard
- Modular design for simple installation and scalability
- Up to 12 Wireless Users (single-cell)
- Up to 4096 Wireless Users (multi-cell)
- Support for Repeaters to easily expand the radio coverage area
- Seamless handoff between Base Stations and Repeaters to assure uninterrupted calls
- Automatic login of the handsets between installations for site-to-site roaming
- Text messaging and application integration for improved productivity
- Power over Ethernet
- Browser Configuration Option
- Operates in its own frequency range. Not subject to interference from other devices such as GSM and WiFi phones
- Low power devices enabling DECT to be used in environments such as hospital

Customer Value

The KIRK Wireless Solution is GAP (Generic Access Profile) compliant and built on the international DECT (Digital Enhanced Cordless Telecommunications) standard, providing dynamic channel selection and allocation for high security and reliability. The modular nature of the KIRK Solution allows customers to easily expand coverage, voice traffic and number of users making it ideal for small to large businesses

About Polycom

Polycom, Inc. (NASDAQ: PLCM) is the global leader in telepresence, video, and voice solutions and a visionary in communications that empower people to connect and collaborate everywhere. Companies choose Polycom for solutions that allow even geographically dispersed workforces to communicate more effectively and productively over distances. Using Polycom voice, video, and telepresence products and services, people connect and collaborate with one another from their desktops, meeting rooms, class rooms, and mobile settings. Working with Polycom standards-based "green" technology, our customers cut the time and costs associated with gathering the right people in one place to solve problems. Instead, their teams more easily and quickly collaborate "face-to-face" wherever they are, better spending organizational resources, time, and energy addressing your company's business challenges. Find out how you can collaborate anytime, anyplace with any device in a virtual experience that's as natural as being there. Visit www.polycom.com.

About ShoreTel, Inc.

ShoreTel, Inc., (NASDAQ: SHOR) is a leading provider of Pure IP Unified Communications solutions. ShoreTel enables companies of any size to seamlessly integrate all communications - voice, video, messaging and data - with their business processes. Independent of device or location, ShoreTel's distributed software architecture eliminates the traditional costs, complexity and reliability issues typically associated with other solutions. ShoreTel continues to deliver the highest levels of customer satisfaction, ease of use and manageability while driving down the overall total cost of ownership. ShoreTel is headquartered in Sunnyvale, California, and has regional offices in the United Kingdom, Sydney, Australia and Munich, Germany.
