

## Sonexis

The leading independent provider of in-house, integrated audio and Web conferencing solutions.

## Products

### • ConferenceManager

Sonexis ConferenceManager is an in-house, integrated audio and Web conferencing bridge.

## Product Overview

Sonexis ConferenceManager is an in-house conferencing bridge that can be configured for audio-only, Web-only, or integrated audio and Web conferencing. Sonexis ConferenceManager integrates with any PBX, or connects directly to the public switched telephone network (PSTN) or your voice over IP (VoIP) network. With Sonexis ConferenceManager, features can be added, user counts increased, and protocols changed through the application of software license keys only. The system has been designed for ease of deployment, installing in under 30 minutes, and ease of use, leveraging common interfaces like Microsoft Outlook and Lotus Notes for conference scheduling and management.

## Solution Overview

At Sonexis, we created ConferenceManager so that businesses could satisfy their conferencing needs with significantly improved savings, ease and control. ConferenceManager provides an in-house solution that's not only cost-effective, easy to use and flexible — it has Web conferencing built in.

## Discover the Benefits

**Saves Big Dollars:** ConferenceManager plugs right into your current networks, leveraging your existing investments—no need for costly upgrades or new infrastructure. And, because you own your own equipment, you can scale the number and size of your conferences without scaling your costs. Say goodbye to those pay-as-you-go subscription costs and say hello to savings as high as 80%.

**Simple as 1-2-3:** Sonexis ConferenceManager can be installed in most environments in under an hour, and it scales easily from 12 to 400 ports of audio and 5 to 400 seats of Web. With ConferenceManager's unique architecture, you're never more than a license key away from adding features, users or protocols. Administration is made simple by intuitive tools, comprehensive reports, and complete flexibility to meet your organization's needs.

Integration with Microsoft Outlook and Lotus Notes makes ConferenceManager just as easy for end users as it is for administrators. Just a few clicks and your organization will be scheduling, launching and recording conferences; collaborating over files in real time; even inviting new conference attendees on-the-fly. ConferenceManager makes it very easy for everyone.

**Puts You In Control:** ConferenceManager's unique "Classes of Service" let you easily configure and assign rights, privileges, features, and functionality. With ConferenceManager, it's not one-size-fits-all. ConferenceManager lets you determine who can do what and when. And, ConferenceManager's comprehensive reporting capability gives you the data you need to make informed decisions about the way you run your organization's conferencing.

“Sonexis ConferenceManager is the perfect complement to our ShoreTel phone system. Our employees love how easy it is to use, our staff was amazed at how easily it integrated with our ShoreTel phone system, and our executives are extremely pleased with how much money it saves us every month. Purchasing Sonexis ConferenceManager is a decision we’d make over and over again.”

## Key Features/Benefits

### Voice Quality and Productivity

ShoreTel’s high-performance, secure network reduces latency and jitter, resulting in high-quality voice communications.

### Integrated Offering

A single ConferenceManager system offers audio, Web, or audio and Web.

### Increased Productivity

High-quality, low-cost communication facilitates collaboration among employees, leading to higher productivity.

### Upgrades Using License Keys Only

ConferenceManager features can be added, user counts increased, and protocols changed through the application of software license keys only.

### Scales Both Up and Down

Integrated system provides a convenient entry point with the ability to change with your needs or environment.

### Works with any Voice or Data Network

One system can be deployed for any PBX or protocol (PSTN or VoIP).

### Ease of Deployment, Administration and Use

ConferenceManager installs in under 45 minutes. “Classes of Service” architecture facilitates setup, management and control. Users schedule and manage meetings through known interfaces (Outlook, Notes).

## Customer-Acclaimed Product Support

### Customer Value

ShoreTel IP telephony solution infrastructure provides businesses with a secure, cost-effective and scalable VoIP solution that is easy to manage.

Sonexis ConferenceManager is an in-house audio conferencing bridge that eliminates the costly pay-as-you-go fees of subscription-based services, while setting new standards for ease-of-use and control. Designed to work within any existing voice or data network—and available with a fully integrated Web conferencing option—ConferenceManager has been deployed by hundreds of leading organizations with minimal cost, effort or administration.
