

AudioCodes Ltd. enables the new voice infrastructure by providing innovative, reliable and cost-effective **Voice over Packet technology** and Voice Network products to ShoreTel VARs. AudioCodes voice network products feature media gateways, which function as core gateways or customer-premises equipment (CPE) voice gateways for packet-based applications in the Microsoft Unified Communications, wire line, wireless, broadband access, and enhanced voice services markets.

## Products

- **Mediant™ 1000 Media Gateway**  
The Mediant™ 1000 Hybrid Media Gateway is a modular, compact and cost-effective media gateway solution which has been designed to interface between time-division multiplexing (TDM) and IP networks in enterprise locations. The compact Mediant™ 1000 modular gateway is extremely scalable and supports multiples of 1, 2 or 4 E1/T1/J1 spans or 1 to 24 analog ports in various FXS/FXO configurations. The Mediant™ 1000 also supports mixed digital/analog configurations.
- **MediaPack™ Analog Media Gateway series**  
The MediaPack™ Analog Media Gateway product family is based on AudioCodes' field-proven and best-of-breed VoIP technology. Featuring 2, 4, 8 or 24 analog ports, the gateways connect analog terminals, PBXs or key systems to the IP network using FXO or FXS connectivity. Compliant Session Initiation Protocol (SIP), the Analog Media Gateways enable flexible deployment and interoperability for the evolving next-generation networks. Using AudioCodes' Analog Media Gateways, System Integrators can effectively deliver converged enterprise-based applications.

## AudioCodes Mediant Media and MediaPack Gateways Product Overview

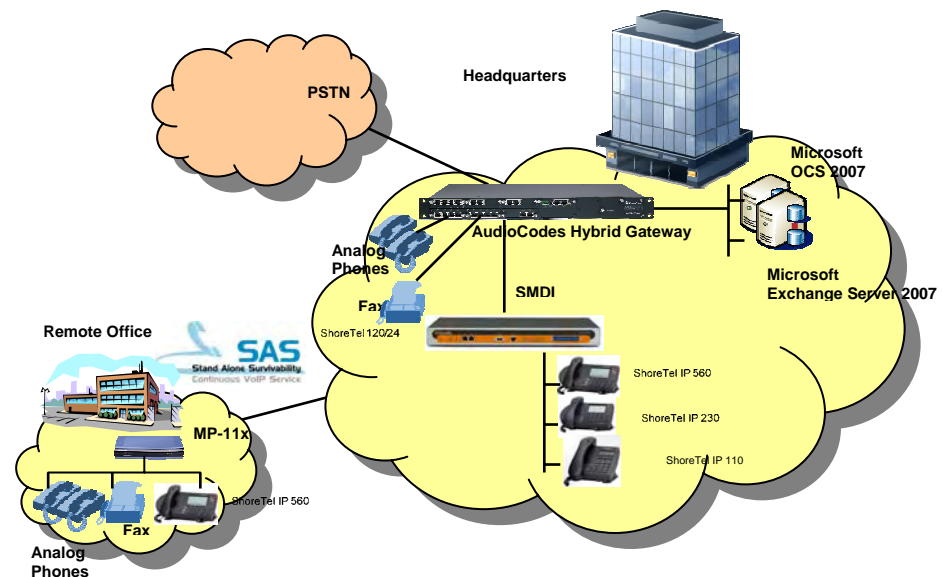

AudioCodes has collaborated with Microsoft to provide ShoreTel customers with a smooth migration from the world of separated telephony and IT environments, to the world of Unified Communications. AudioCodes offers the enterprise customer a key component in the unified telephony network, the Media Gateway that connects the ShoreTel system with Microsoft Exchange Server 2007 and Microsoft Office Communications Server 2007.

AudioCodes Mediant Media Gateways are cost-effective VoIP media gateways utilizing cutting edge technology. Intelligently packaged in a stackable 1U chassis, they are designed to interface between Enterprise legacy telephony and IP networks.

The AudioCodes MediaPack and Mediant Media Gateways support different standalone and modular configurations, enabling the connection of the Microsoft Unified Communications solution to ShoreTel Systems using different types of telephony interfaces, including E1/T1/J1 spans, Basic Rate Interfaces (BRIs) and/or analog ports in various FXO/FXS configurations.

In addition, the AudioCodes Mediant 1000 and the Mediant 2000 Media Gateways can be ordered as Basic Hybrid Gateways, supporting an integrated Microsoft Mediation Server, with up to 16 and 120 RTA channels respectively.

## Solution Overview

"The AudioCodes gateway was viewed as a necessary step as we integrate multiple locations with Microsoft Office Communications Server 2007. The AudioCodes product flexibility and features, as well as the fact that the gateway can support Exchange Server 2007, Office Communications Server 2007, and PSTN connections simultaneously, were key factors in our decision. We are pleased with the performance of the AudioCodes gateway and the ease of its integration with both existing phone switches and the Microsoft environment."

- Rick Miller, Mgr of Enterprise LAN Services at ConAgra Foods

#### **AudioCodes Benefits for ShoreTel Customers**

- Cost effectively integrates Microsoft Exchange Server 2007 and Office Communications Server 2007.
- Support for both Basic Gateway and Basic Hybrid Gateway configurations on the same platform.
- Scalable to meet all Enterprise requirements.
- Compelling Price / Performance.
- Industry's best voice quality.
- Fully compliant with SIP standards and certified with ShoreTel.
- Reduced capital expense.
- Leverages current investments in legacy telephony equipment.
- IP connectivity for geographically dispersed organizations.
- Remote office Survivability.
- Migrate to a total IP environment at the Enterprise's own pace.

## **Key Features/Benefits**

### **Voice Quality**

High-performance, secure network reduces latency and jitter, resulting in high-quality voice communications. Wide band audio codecs deliver outstanding voice quality.

### **Increased Productivity**

High-quality, low-cost communication facilitates collaboration among employees, leading to higher productivity.

### **Ease of Use**

With a perceptive design and plug-and-play implementation, ShoreTel systems live up to their reputation as the industry's easiest solutions to deploy and use.

### **Best-in-Class Management**

Centralized management capabilities reduce the time spent on network deployment and maintenance, increasing flexibility and reducing cost of ownership.

### **Scalability**

ShoreTel provides solutions to address small to large enterprises with equipment suited for headquarters, regional and remote or home offices.

### **Customer Value**

ShoreTel IP telephony solution infrastructure provides businesses with a secure, cost-effective, and scalable VoIP solution that is easy to manage.

AudioCodes is a valuable and key supplier of innovative, reliable and cost-effective VoIP technology, network products and applications enabling the new voice infrastructure.

### **About AudioCodes**

AudioCodes Ltd. provides innovative, reliable and cost-effective Voice over IP (VoIP) technology, Voice Network Products, and Value Added Applications to Service Providers, Enterprises, OEMs, Network Equipment Providers and System Integrators worldwide. The company is a market leader in VoIP equipment, focused on VoIP Media Gateway, Media Server, Session Border Controllers (SBC), Security Gateways and Value Added Application network products.

### **About ShoreTel, Inc.**

ShoreTel is a leading provider of enterprise IP telephony solutions. The AudioCodes -ShoreTel solution provides customers with a number of key benefits, including ease of use, manageability and lower total cost of ownership.
